OBJECTIVE

Full Stack Developer skilled in building and maintaining robust backend systems, RESTful APIs, and polished frontend applications. Seeking to deliver end-to-end solutions from database to user interface in high-impact projects.

EDUCATION

ALX Software Engineering Programme, ALX Africa   2022 – 2023
Intensive full-stack program covering algorithms, backend development, frontend development, databases, version control, and deployment workflows.

SKILLS

Programming Languages	TypeScript, JavaScript, Python, Golang, Solidity
Frameworks/Libraries	React, Next.js, Tailwind CSS, Shadcn/UI, Express, Django
Database	MongoDB, PostgresSQL, MySQL
Developer Tools	Git/GitHub, VSCode, Postman
Soft Skills	Collaboration, Problem Solving, Communication, Adaptability

EXPERIENCE

Backend Developer (Volunteer) — YorubaEcho.com   2025 – Present
Remote / NGO

- Designed and built RESTful APIs consumed by web clients.
- Architected and managed database schemas, ensuring data consistency, indexing, and query optimization.
- Handled deployment pipelines, monitored production environments, and resolved bugs and outages.
- Collaborated with front-end developers and stakeholders to translate requirements into technical solutions.

ACHIEVEMENTS

Panel Quest Hackathon, Directus   2023
Won the Directus community vote for StackSync Panel, a custom integration with Paystack that enables customer management, product tracking, and payment requests directly from the Directus Insights dashboard.

PROJECTS

Wagr — Decentralized Betting App: (Live Demo)   *NextJS, TypeScript, Tailwind, Node.js, Socket.io, Solidity*
Designed and implemented smart contract interactions, blockchain event listeners, and real-time socket updates for smooth on-chain betting experiences.

IPVerse — Decentralized IP Platform: (Live Demo)   *NextJS, TypeScript, Tailwind, Appwrite, OriginSDK*
Integrated the Origin SDK for real-time IP tracking and intellectual property tokenization and monetization. Finalist project at the CampNetwork hackathon.

YorubaFit — AI-powered Try-on Storefront (Live Demo)   *NextJS, TypeScript, Tailwind, Stripe*
An AI-powered Yoruba Fila and Gele virtual try-on storefront that allows users to upload photos and visualize headwear before purchasing. Combines AI image processing with e-commerce functionality.

UnitySave — Savings App — Live Demo   *NextJS, TypeScript, Tailwind, Django*
Cooperative savings platform inspired by Ajo/Esusu. Work in progress; responsible for frontend and payment integration, collaborating on backend.
